Professional Experience

Innova Solutions for Verizon

Lead Experience Designer | Nov 2023 – Present

Design and lead UX initiatives for IoT & AI-driven projects including Data Marketplace, Data Governance, and AI-powered Customer Chatbot. Collaborate across 5+ cross-functional teams (Product, Engineering, Platform, Business) to navigate ambiguous problem spaces and drive design excellence.

- Took an undefined brief for an AI-powered Customer Chatbot to a comprehensive UX strategy impacting 1000s of users.
- Partnered with platform teams to define Data Governance UX for enterprise power users.
- Established design patterns and best practices for emerging AI features across multiple products.
- Mentored the design team on enterprise design thinking and AI integration principles.

M2P Fintech

Manager, Experience Design | May 2021 – Oct 2023

Led design for the payment & credit vertical, managing a team of 3-4 designers across Credit Card, Prepaid, UPI, LOS, LMS, and MMS products. Delivered seamless, user-centered financial experiences while establishing design standards and mentoring junior designers.

- Guided 3-4 designers in shipping 5+ mission-critical payment products impacting millions of transactions.
- Created and maintained a scalable design system, reducing design-to-dev handoff time by 40%.
- Mentored 2 junior designers, advancing them into mid-level design roles.
- Implemented a user research program that improved product usability across verticals.

- Designed complex credit workflows (LOS, KYC), improving customer conversion by 25%.

Aquaconnect

Lead Designer | Jan 2020 – Mar 2021

Owned end-to-end UX for Aquaculture SaaS products, partnering with Product, Engineering, and Business teams to simplify complex farm-management workflows through data-driven dashboards and mobile-first design.

- Designed intuitive workflows for pond monitoring, feed management, inventory, and harvest planning.
- Built real-time analytics dashboards that improved decision-making for farmers and enterprise customers.
- Optimized responsive, mobile-first interfaces for field users operating in low-connectivity environments.
- Ran interviews and usability testing with farmers and stakeholders to validate product decisions.

Alten Calsoft Labs

Sr. UX Designer | Jun 2019 – Oct 2019

Designed enterprise web applications for global technology clients, translating business requirements into user-centered experiences through wireframes, prototypes, and production-ready UI.

- Managed the Paul Hartmann account (Healthcare), designing enterprise web experiences for complex clinical workflows.
- Designed workflow-driven dashboards for B2B enterprise platforms across multiple product modules.
- Delivered user flows, wireframes, and interactive prototypes from concept through high-fidelity visual design.
- Applied heuristic evaluations and UX best practices to reduce user friction.

Born Group

Product Specialist | Dec 2018 – Jun 2019

Designed eCommerce experiences for global retail brands across web and mobile, partnering with stakeholders and developers to create conversion-focused digital journeys.

- Designed end-to-end customer journeys for product discovery, cart, checkout, and account management.
- Improved interface consistency and user flows to lift engagement and purchase completion.
- Delivered consistent, responsive experiences across desktop, tablet, and mobile.
- Used reusable components and design guidelines to scale consistency across brands.

Sr. Graphic Designer | Jul 2012 – Aug 2018

Led visual and graphic design for global retail and marketing campaigns, producing brand assets and creative collateral across print and digital channels.

- Designed marketing creative — banners, catalogs, and campaign assets — for global retail and eCommerce clients.
- Maintained visual consistency across print and digital collateral in line with brand guidelines.
- Partnered with marketing and web teams to deliver launch-ready creative for seasonal campaigns.
